

Renaming Report Titles for Printing.

The Print, Export and Copy to Clipboard features are a great tool for easily sharing your FARMAX data with your team or for using it in a report or presentation. You are able to give your table or plot a more meaningful name for context when sharing with others.

Simply double click on the report title, you will be presented with a pop-up window allowing you to change the name of the report title and the sub title.

The screenshot shows a dialog box titled "Edit Title". It contains two text input fields. The first field is labeled "Title" and contains the text "Numbers for Cows". The second field is labeled "Subtitle (for printing)" and contains the text "Example Dairy Farm : Dairy, Jun 16 - May 17". At the bottom of the dialog box, there are three buttons: "Set to Defaults", "OK", and "Cancel".

This feature is intended for copying purposes, renaming does not persist beyond the current session. The feature is available on any page that has a Print menu.
